

**Name:** *Mexican Gold Onyx Boulders*

**Description:** Like a brightly burning meteor, Mexican onyx is an unconventional blend of invitingly warm tones yet jagged and cold to the touch. White marble veins worm their way through this golden-toned boulder.

**Sizes:** 1', 1.5', 2', 2.5', 3', 3.5', 4', 4.5', 5'

**Color:** Deep gold with white marbling

**Geology:** Calcitic in origin
